

THE BEST DEFENSE

People defend themselves in many different ways. We run, hide, kick, scream and fight.

WHAT ABOUT INSECTS?

This insect defends itself by pinching.

Use the sheet of paper provided to write out the **DEFENSE** used by the insects in the plastic box(es).

COMMON INSECTS AND THEIR DEFENSES

Insects will bite, kick and scream to get away from things that want to eat them.

Other ways that insects defend themselves:

TASTING BAD

some insects just taste bad.

Ladybugs use a yellow poison that tastes bad.

They can also hide, play dead or fly away.

STINGING

many insects protect themselves by stinging.

COSTUME

some insects look tough. This fly looks like a stinging bee.

GROUPS

There is safety in numbers. Ants team up to get the job done.
